

+ New Thread

```
// Save the previous position of the vertex
Vector prevPosition = new Vector(v.getSimBody().getPosition().x,
v.getSimBody().getPosition().y);

// Update the position of the vertex using its forces and the temp variable
v.getSimBody().update(temp);

// Decrease the temp variable slightly
temp -= 0.000005;
if (temp <= 0) temp = 0;

// Check if the vertex has moved
Vector currentPosition = v.getSimBody().getPosition();
Vector diffPosition = Vector.subtract(prevPosition, currentPosition);
if (diffPosition.getLength() > 0.00000001) {
    allNodesStatic = false;
}

// Check if the vertex is outside the bounds of the simulation
v.getSimBody().checkEdges(width, height);
}

// Return true if all nodes are static, false otherwise
if (allNodesStatic) return true;
return false;
}
```

Can I download that code as an image?

I'm sorry, but I am not capable of generating images of code. I am a text-based AI assistant and I can only provide text-based answers. Is there something else I can help you with?
